

4e - Chapitre 1 : Nombres Relatifs - Questions Flash 04

Effectue les calculs suivants.

$$D = 15 - 12 + 4 - 16$$

$$G = (-3 + 10) - (4 - 15) - (-12 - 8)$$

$$I = -23 - [40 - (3 - 19)]$$

$$F = -3 + (1 - 5) \times (-6)$$

$$B = \frac{7 - (-11)}{-1 - 1}$$

$$D = 3 + 4 - 16 = 7 - 16 = -9$$

$$G = 7 - (-11) - (-20) = 18 - (-20) = 38$$

$$I = -23 - (40 - (-16)) = -23 - 56 = -79$$

$$F = -3 + (-4) \times (-6) = -3 + 24 = 21$$

$$B = \frac{18}{-2} = -9$$
